

PIKO

New Items 2022

FOREWORD

Dear PIKO HO fans,

The model railroad hobby is and remains a wonderful pastime. In 2021, we worked hard in Sonneberg and Chashan to bring you a variety of new HO trains. One of those innovative new models was the BR 83.10, which filled a noticeable void in the 1:87 German model train market. The success we had with the 83.10 gave us the idea to develop another European HO tank locomotive: the Prussian T 14, later known as the BR 93.0-4. The T 14 will be joining our Expert line in several European road names.

In addition to the T 14, we will revisit the subject of first-generation electric locomotives this year. Following last year's successful release of the E 32, we will continue to focus on early electric freight engines with a model of the E 94.

Fans of modern electric traction have not been ignored. They can look forward to a brand new model of the BR 152 in era V and VI variations.

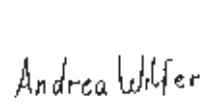

Our HO passenger car range will expand this year to include the venerable three-axle Umbauwagen of the Deutsche Bundesbahn. These cars can be used to create numerous prototypical trains with matching PIKO locomotives.

Finally, we are particularly pleased to welcome you back to Sonneberg on June 18th of this year for our annual Open House. You will again have a chance to tour our plant and observe in-person how our models are made.

So, from all of us at PIKO,
we wish you happy model railroading in the new year!

Ortrun D. Wilfer

Dr. René F. Wilfer

Andrea Wilfer

This year we can finally welcome you back to our plant in Sonneberg as we celebrate our 12th annual Open House on June 18, 2022.

Please take time to familiarize yourself with our local Covid 19 restrictions before attendance. More information on our 2022 Open House can be found on page 20.

TECHNICAL DETAILS:

See 2022 main catalog, page 7.
PSD XP 5.1 are mfx-compatible!

PIKO Expert Plus cars: innovative models for the ultimate model railroading experience.

Featuring a variety of sound and light functions like realistic operational sounds, welding flashes, and flickering computer monitors.

IT'S THAT TIME OF YEAR AGAIN: OPEN HOUSE 2022!

This year we can finally welcome you back to our plant in Sonneberg as we celebrate our 12th annual Open House on June 18, 2022.

Please take time to familiarize yourself with our local Covid 19 restrictions before attendance (see QR code on the right).

Come experience our wide range of G, HO, TT and N scale models up close. Watch as our employees create G scale models before your eyes, or chat with the members of our design team. Of course, there will be plenty of opportunity to buy attractive limited edition models, and second hand models at discounted prices. The event will be well-catered for with Thuringian specialties and cold or hot beverages. Our younger guests will enjoy the large bounce house and other kid-friendly activities.

To make your journey to our 2022 Open House an unforgettable experience, we have chartered several trains to Sonneberg (see information on the right). Naturally, you can also travel by "normal" train as well. A free bus shuttle will take you from Sonneberg station to the PIKO site.

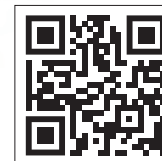

Plenty of nearby parking spaces will be available for our guest arriving by car.

Use the QR code on the right to download the registration form for our 2022 Open House. Please note that there may be long wait times to enter the facility, as we must abide by Covid19 regulations on the number of visitors that can be in the building. Admission to certain activities during the day may also be restricted. We appreciate your cooperation; for our employees' well-being as well as yours

We look forward to seeing you here in Sonneberg and we wish you a pleasant journey!

Further information and registration forms can be found here:

The model:

In contrast to the prototype, the PIKO three-axle Umbauwagen does not recycle any parts from a previous model but is an all-new model from the Expert line. Our 1:87 Umbauwagen is a perfect replica of the 1:1 original down to the smallest detail. Separately attached railings are just as much a part of this period-correct model as the crystal-clear flush mounted windows and the finely detailed interior. The underframe also shares the

Note: Set #58243 is the perfect addition to the E 41 push-pull train set (# 58144 / # 58145). See back page.

58405 Building block car

56061 - (Car does not include building blocks)

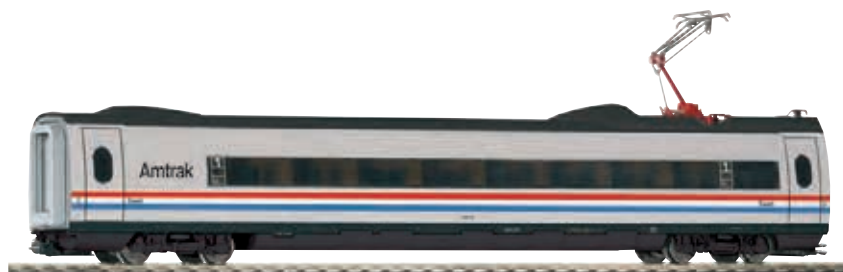

The model:

The imaginations of young (and not-so-young!) model railroaders should run wild at the thought of a train car that can be built and rebuilt any way they want it with the new PIKO building block car. Aspiring model railroaders can use their favorite building blocks; the possibilities are endless! Whether they are by themselves or with family and friends, younger modelers will always be creating new works of art on the building block car. The car can be coupled to any HO locomotive. Model railroading with PIKO has never been more fun!

**53123 DGBgq 3-unit articulated Bilevel passenger car green DR IV**

🚂 # 56060

In 1957, the DR went ahead with plans to build five car articulated bilevel commuter trains to get rush hour traffic in the cities of the DDR to move more quickly. The main areas these trains were used in were Halle-Leipzig, the Berlin belt railroad, Dresden, and Magdeburg. Rigorous daily

operation demanded a lot from these trains, and often individual cars would be taken out of the consist so there would only be three or four car trainsets. The prototype for our model is one of those three car sets, which is implemented in 1:87 scale with PIKO's usual high standards of quality.
